

Eureka Razor Blade Sharpener

Congratulation on the purchase of the Eureka Razor Blade Sharpener. Eureka cleans and sharpens your Razor Blade and is suitable for all normal Razor Blades. The number of shaves per blade can extend 6 times what will save a lot of money. Before shaving move the razor blade 5 to 6 times opposite the direction of the shaving over the leather strop. See sketch on the backside. Eureka will not clean exceptional debris from old shaving foam and rest of whisker. Use for this purpose an old (discarded) toothbrush and clean the razor under warm running water. In the course of time the leather may discolor but the function is not affected..
